

1

Search for “Tuya Smart” in your app store or scan the below QR code to download the app

2

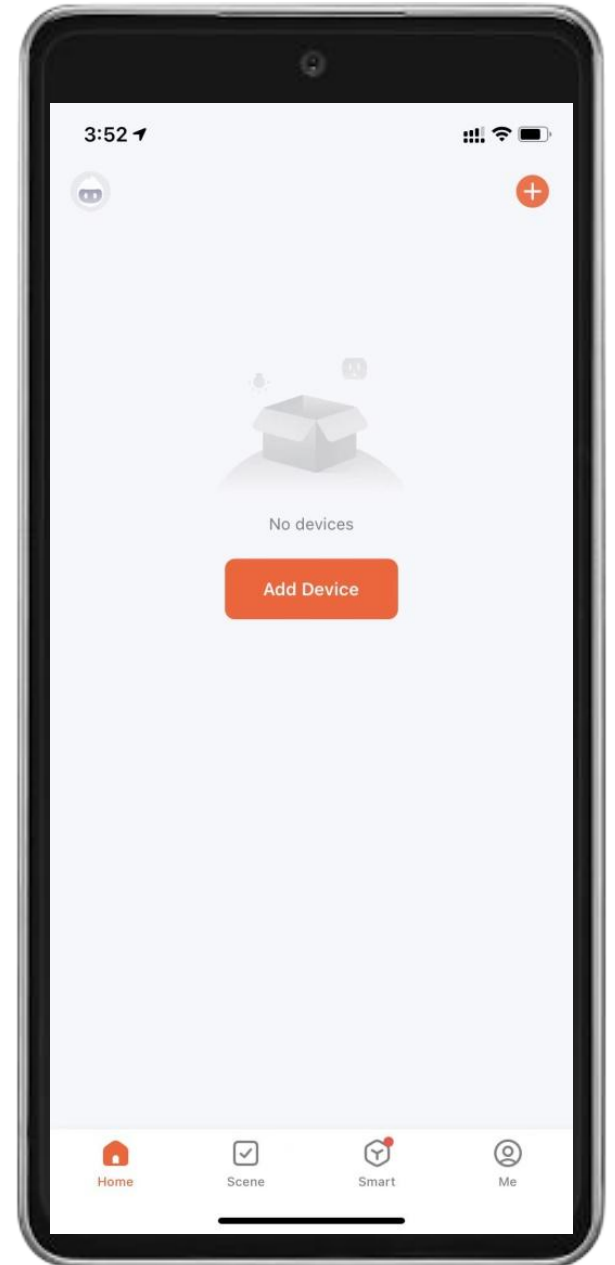

Your device needs to be connect to WI-FI and your bluetooth needs to be switched on

3

Use a cable to connect the controller to the water heater. Switch on the geyser, and the WI-FI light on the controller will start flashing

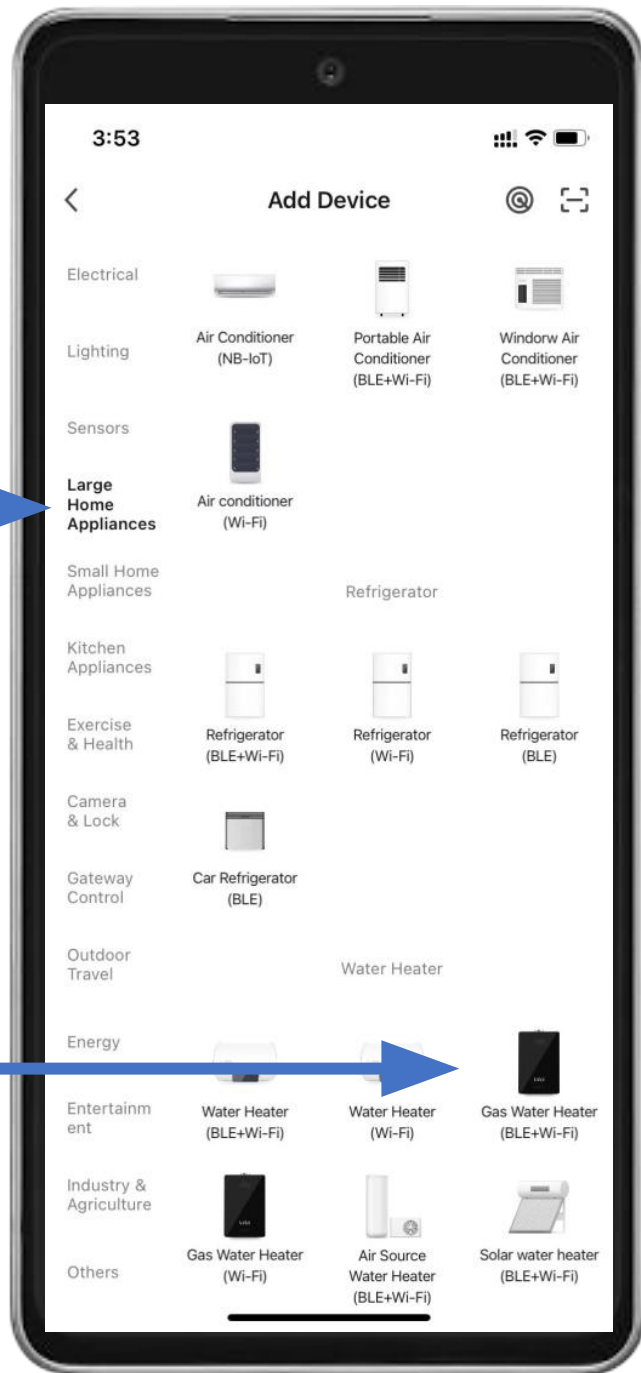

4

Open the app and click “Add Device” or the “+” in the top right corner

5

Select "Large Home Appliances"

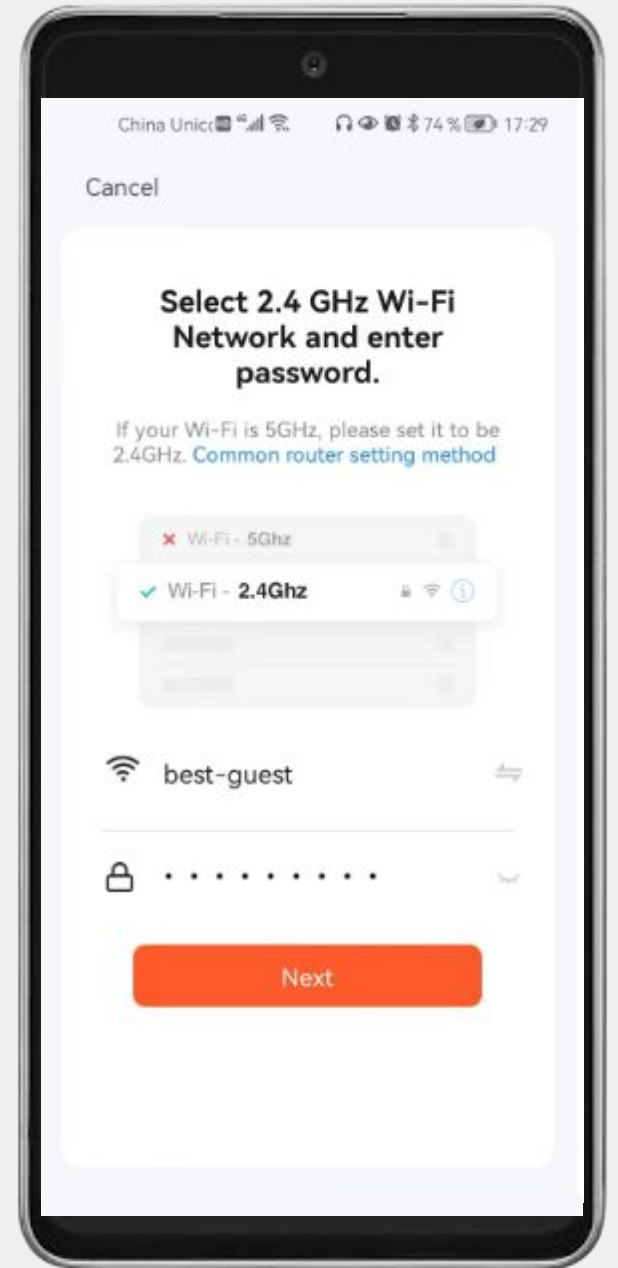

Click "Gas Water Heater"

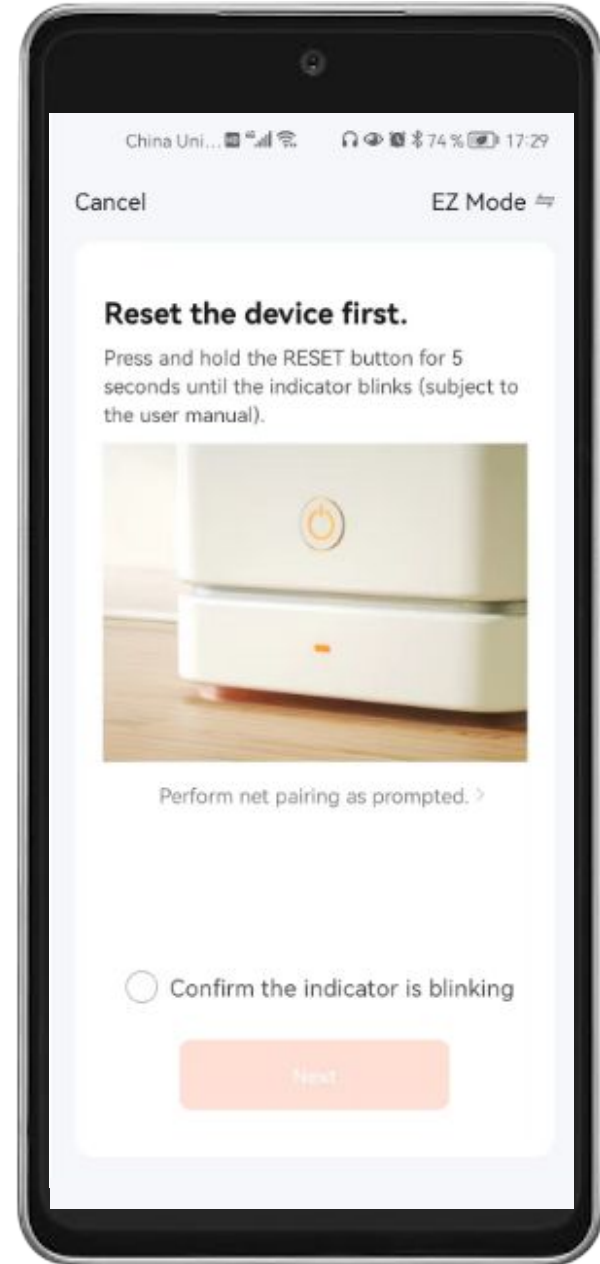

6

Sign into your WI-FI

- 7 Make sure the light is flashing
- 8 Once connected the WI-FI light on the controller will always be on
- 9 If the WI-FI indicates that is off then there is error in the connection
- 10 To restart or reset the connection, press the button for around 5s until the WI-FI light starts flashing again.
